📍 Ribeirão Preto, São Paulo, Brazil

I'm a self-taught software engineer with a dedication to building and optimizing web projects. Specializing in front-end development with React, and with an exploratory experience in Node.js for back-end integration, I focus on high performance, semantic integrity and best practices. Driven by a passion for continuous learning and improvement, my objective is to craft intuitive and engaging web experiences.

## EXPERIENCE

### FULL-STACK ENGINEER (FRONT-END FOCUS) CVC Brasil (CVC Corp) | 2021 - 2023

I worked as a full-stack developer at a leading travel agency, focusing on front-end development using React and Next.js for internal solutions and e-commerce functionalities. I also addressed specific back-end needs using Java/Spring Framework, NodeJS, and Golang to enhance services consumed by applications.

### FRONT-END ENGINEER/TECH LEADER Grupo Fleury/Saúde iD | 2019 - 2021

I was actively involved in the digital transformation process for one of the country's foremost health organizations. Starting as a front-end engineer, I worked with React and Next.js, integrating real-time applications through WebSockets. After being promoted to technical leader, I took charge of making technical decisions about specific products in the company's ecosystem and coordinating the developer team's deliveries, including code reviews and CI/CD environment configuration. In addition to technical tasks, I also managed the team's personnel, organizing one-on-one feedback sessions, for example.
